

Minerallac Stainless Steel Hardware

Full selection of stainless steel hardware for the toughest applications

Minerallac Stainless Steel offers a comprehensive selection of Stainless Steel hardware, including: Hangers, Straps, Clamps, Nuts, Washers, Screws, Bolts, Anchors, Couplings, and more. With hundreds of products offered in one or more varieties of Stainless Steel, including 18-8, 304, 316, and 410, Minerallac offers the most complete range of Stainless Steel products in the industry.

Conduit Hangers

Conduit Straps

Beam Clamps

Strut Accessories

Hex Nuts

Washers

Hex Head Cap Screws

Hex Head Tap Bolts

Hex Head Lag Bolts

Carriage Bolts

Anchors

Machine Screws

Stove Bolts

Sheet Metal Screws

Tek Screws

Threaded Rod

Hex Rod Coupling

Miscellaneous

Why Choose Minerallac?

- Over 120 years of market experience
- Large range of sizes
- Quick Shipping
- Competitive Pricing
- Single purchase order
- Minerallac Advantage

Minerallac Stainless Steel Hardware

WHY STAINLESS STEEL?

Stainless steel fasteners are the ideal choice for installations where strength, corrosive or harsh environments, aggressive washdown, sanitization, or water is a factor. They are also perfectly suited to electrical applications because, due to its poor electrical conductivity, the use of stainless steel increases worker safety during installation. Best of all, stainless steel offers these benefits while maintaining a high-quality surface finish.

STRONG

Stainless steel is remarkably strong given its flexibility. It can withstand extended periods of extreme temperatures.

WITHSTANDS HARSH/CORROSIVE ENVIRONMENTS AND AGGRESSIVE WASHDOWN

Resistant to many corrosive or abrasive materials, stainless steel can withstand significant environmental abuse while maintaining an attractive finish. Extreme heat or cold, or exposure to high-force water does not impact stainless steel like it would other metals.

RUST-RESISTANT AND SANITARY

Well suited for applications that require frequent cleaning or exposure to liquid, such as hospitals, food handling applications, or laboratories to name a few, stainless steel is resistant to rust and surface damage.

SAFER ALTERNATIVE

Electrical contractors are exposed to electricity as part of the job. Stainless steel is a poor conductor of electricity, making stainless steel fasteners an ideal choice to improve safety.

TYPES OF STAINLESS STEEL

Stainless Steel Type	Properties
18-8	Most common designation for non-magnetic stainless steel fasteners. Corrosion-resistant.
304	Most popular stainless steel for hex head cap screws. Increased welding capacity. Resists most oxidizing acids and can withstand all ordinary rusting. Non-magnetic.
316	Increased corrosion resistance to chloride and sulfides. Increased welding capacity. Non-magnetic.
410	Increased strength. Ideal for highly stressed conditions. Magnetic.

Note: Not all products are available in all types of Stainless Steel. Please see catalog for details.
